Hello,

We noticed this is your first app submission and want to congratulate you on joining the Apple Developer Program. We look forward to working together on your submissions.

When App Review identifies an issue with a submission, we'll contact you with a message in App Store Connect with details about what we found and how to resolve the issue. Learn more about App Review and tips for a smooth review experience.

See below for additional information about the issues that require your attention for this submission. If you have any questions, we are here to help. Reply to this message in App Store Connect and let us know.

Review Environment

Submission ID: 46c43ee8-2973-43e2-8ccf-2b3b6bd0398e

Review date: April 14, 2026

Review Device: iPad Air 11-inch (M3)

Version reviewed: 1.2.0

Guideline 2.1(a) - Performance - App Completeness

Issue Description

The app exhibited one or more bugs that would negatively impact users.

Bug description:

The "Add" button on the "Todos" and "Shopping list" pages were unresponsive.

The "Add chore", "Add expense" and "Add subscription" buttons caused an error message to appear.

Review device details:

- Device type: iPad Air 11-inch (M3)
- OS version: iPadOS 26.4
- Internet Connection: Active

Next Steps

Test the app on supported devices to identify and resolve bugs and stability issues before submitting for review.

If the bug cannot be reproduced, try the following:

- For new apps, uninstall all previous versions of the app from a device, then install and follow the steps to reproduce.
- For app updates, install the new version as an update to the previous version, then follow the steps to reproduce.

Note that users expect apps they download to function on all the devices where they are available. For example, apps that may be downloaded onto iPad devices should function as expected for iPad users.

Resources

- For information about testing apps and preparing them for review, see [Testing a Release Build](#).
- To learn about troubleshooting networking issues, see [Networking Overview](#).

Guideline 5.1.1(ii) - Legal - Privacy - Data Collection and Storage

Issue Description

One or more purpose strings in the app do not sufficiently explain the use of protected resources. Purpose

strings must clearly and completely describe the app's use of data and, in most cases, provide an example of how the data will be used.

Next Steps

Update the camera and photo library purpose string to explain how the app will use the requested information and provide a specific example of how the data will be used. See the attached screenshot.

Resources

Purpose strings must clearly describe how an app uses the ability, data, or resource. The following are hypothetical examples of unclear purpose strings that would not pass review:

- "App would like to access your Contacts"
- "App needs microphone access"

See examples of [helpful, informative purpose strings](#).

Guideline 2.1(b) - Performance - App Completeness

Issue Description

The In-App Purchase products in the app exhibited one or more bugs which create a poor user experience. Specifically, when we tapped the "subscription" option in settings, an error appeared. Review the details and resources below to troubleshoot this issue.

Review device details:

- Device type: iPad Air 11-inch (M3)
- OS version: iPadOS 26.4

Next Steps

Apple reviews In-App Purchase products in the sandbox and the In-App Purchase products do not need prior approval to function in review. Review the [product configurations](#), [complete any missing information](#), and [test them in the sandbox](#).

To offer In-App Purchases in the app, the Account Holder must also accept the [Paid Apps Agreement](#) in the Business section of App Store Connect. Confirm you have a Paid Apps Agreement [in effect](#).

If you still need assistance after completing the steps and reviewing the resources, visit the [Apple Developer Forums](#). If you can't find an answer from an existing thread, start a new thread with your question to get guidance from Apple engineers and other developers.

Resources

Learn more about app completeness requirements in [guideline 2.1\(b\)](#).

Guideline 1.5 - Safety

Issue Description

The Support URL provided in App Store Connect, <https://wohnlly.app>, is currently not functional and/or

displays an error.

Next Steps

Update the specified Support URL to direct users to a functional webpage with support information.

Resources

- Learn about Support URLs and other platform version information on [App Store Connect Help](#).
- Learn more about developer information requirements in [guideline 1.5](#).

Support

- Reply to this message in your preferred language if you need assistance. If you need additional support, use the [Contact Us module](#).
- Consult with fellow developers and Apple engineers on the [Apple Developer Forums](#).
- Provide feedback on this message and your review experience by [completing a short survey](#).
